Java SE 27 & JDK 27

Interface FileFilter

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface FileFilter
```

A filter for abstract pathnames.

Instances of this interface may be passed to the `listFiles(FileFilter)` method of the `File` class.

Since:

1.2

Method Summary

All Methods	Instance Methods	

Modifier and Type	Method	Description
`boolean`	**`accept`**`(File pathname)`	Tests whether or not the specified abstract pathname should be included in a pathname list.

Method Details

accept

`boolean accept(File pathname)`

Tests whether or not the specified abstract pathname should be included in a pathname list.

Parameters:

`pathname` - The abstract pathname to be tested
