Java SE 27 & JDK 27

Class InvalidObjectException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.io.IOException
        java.io.ObjectStreamException
          java.io.InvalidObjectException

All Implemented Interfaces:

Serializable

```
public class InvalidObjectException
extends ObjectStreamException
```

Indicates that one or more deserialized objects failed validation tests. The argument should provide the reason for the failure.

Since:

1.1
