Java SE 27 & JDK 27

Class EnumConstantNotPresentException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.EnumConstantNotPresentException

All Implemented Interfaces:

Serializable

```
public class EnumConstantNotPresentException
extends RuntimeException
```

Thrown when an application tries to access an enum constant by name and the enum type contains no constant with the specified name. This exception can be thrown by the API used to read annotations reflectively.

Since:

1.5
