Java SE 27 & JDK 27

Class ThreadDeath

java.lang.Object
    java.lang.Throwable
        java.lang.Error
            java.lang.ThreadDeath

All Implemented Interfaces:

Serializable

```
@Deprecated(since="20",
            forRemoval=true)
public class ThreadDeath
extends Error
```

Deprecated, for removal: This API element is subject to removal in a future version.
Thread originally specified a "`stop`" method to stop a victim thread by causing the victim thread to throw a `ThreadDeath`. It was inherently unsafe and deprecated in an early JDK release. The `stop` method has since been removed and `ThreadDeath` is deprecated, for removal.

An instance of `ThreadDeath` was originally specified to be thrown by a victim thread when "stopped" with the `Thread` API.

Since:

1.0
