Java SE 27 & JDK 27

Class IncompleteAnnotationException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.annotation.IncompleteAnnotationException

All Implemented Interfaces:

Serializable

```
public class IncompleteAnnotationException
extends RuntimeException
```

Thrown to indicate that a program has attempted to access an element of an annotation interface that was added to the annotation interface definition after the annotation was compiled (or serialized). This exception will not be thrown if the new element has a default value. This exception can be thrown by the API used to read annotations reflectively.

Since:

1.5
