Serialized Form

Constructor Summary

Constructors

Constructor	Description
LambdaConversionException()	Constructs a LambdaConversionException.
LambdaConversionException (String message)	Constructs a LambdaConversionException with a message.
LambdaConversionException (String message, Throwable cause)	Constructs a LambdaConversionException with a message and cause.
LambdaConversionException (String message, Throwable cause, boolean enableSuppression, boolean writableStackTrace)	Constructs a LambdaConversionException with a message, cause, and other settings.
LambdaConversionException (Throwable cause)	Constructs a LambdaConversionException with a cause.

Method Summary

Methods declared in class Throwable

addSuppressed, fillInStackTrace, getCause, getLocalizedMessage, getMessage, getStackTrace, getSuppressed, initCause, printStackTrace, printStackTrace, printStackTrace, setStackTrace, toString

Methods declared in class Object

clone, equals, finalize, getClass, hashCode, notify, notifyAll, wait, wait, wait

Constructor Details

LambdaConversionException

```
public LambdaConversionException()
```

Constructs a LambdaConversionException.

LambdaConversionException

```
public LambdaConversionException(String message)
```

Constructs a LambdaConversionException with a message.

Parameters:

message - the detail message

LambdaConversionException

```
public LambdaConversionException(String message,
                                 Throwable cause)
```

Constructs a LambdaConversionException with a message and cause.

Parameters:

message - the detail message

cause - the cause

LambdaConversionException

```
public LambdaConversionException(Throwable cause)
```

Constructs a LambdaConversionException with a cause.

Parameters:

`cause` - the cause

LambdaConversionException

```
public LambdaConversionException(String message,
                                 Throwable cause,
                                 boolean enableSuppression,
                                 boolean writableStackTrace)
```

Constructs a `LambdaConversionException` with a message, cause, and other settings.

Parameters:

`message` - the detail message

`cause` - the cause
