Java SE 27 & JDK 27

Class InvocationTargetException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.ReflectiveOperationException
        java.lang.reflect.InvocationTargetException

All Implemented Interfaces:

Serializable

```
public class InvocationTargetException
extends ReflectiveOperationException
```

InvocationTargetException is a checked exception that wraps an exception thrown by an invoked method or constructor.

Since:

1.1

Method, Constructor, Serialized Form

Constructor Summary

Constructors

Modifier	Constructor	Description
protected	**InvocationTargetExceptio**	Constructs an InvocationTargetException with null as the target exception.
	InvocationTargetExceptio(Throwable target)	Constructs a InvocationTargetException with a target exception.
	InvocationTargetExceptio(Throwable target, String s)	Constructs a InvocationTargetException with a target exception and a detail message.

Method Summary

All Methods | **Instance Methods**

Modifier and Type	Method	Description

Throwable	**getCause**()	Returns the cause of this exception (the thrown target exception, which may be null).
Throwable	**getTargetException**()	Get the thrown target exception.

Methods declared in class Throwable

addSuppressed, fillInStackTrace, getLocalizedMessage, getMessage, getStackTrace, getSuppressed, initCause, printStackTrace, printStackTrace, printStackTrace, setStackTrace, toString

Methods declared in class Object

clone, equals, finalize, getClass, hashCode, notify, notifyAll, wait, wait, wait

Constructor Details

InvocationTargetException

```
protected InvocationTargetException()
```

Constructs an InvocationTargetException with null as the target exception.

InvocationTargetException

```
public InvocationTargetException(Throwable target)
```

Constructs a InvocationTargetException with a target exception.

Parameters:

target - the target exception, may be null

InvocationTargetException

```
public InvocationTargetException(Throwable target,
                                 String s)
```

Constructs a InvocationTargetException with a target exception and a detail message.

Parameters:

target - the target exception, may be null

s - the detail message, may be `null`

Method Details

getTargetException

```
public Throwable getTargetException()
```

Get the thrown target exception.

API Note:

This method predates the general-purpose exception chaining facility. The `Throwable.getCause()` method is now the preferred means of obtaining this information.

Returns:

the thrown target exception (cause of this exception).

getCause

```
public Throwable getCause()
```

Returns the cause of this exception (the thrown target exception, which may be `null`).

Overrides:

`getCause` in class `Throwable`

Returns:

the cause of this exception.

Since:

1.4
