Java SE 27 & JDK 27

Class MalformedParameterizedTypeException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.reflect.MalformedParameterizedTypeException

All Implemented Interfaces:

Serializable

```
public class MalformedParameterizedTypeException
extends RuntimeException
```

Thrown when a semantically malformed parameterized type is encountered by a reflective method that needs to instantiate it. For example, if the number of type arguments to a parameterized type is wrong.

Since:

1.5
