Constructor Details

ReflectPermission

```
public ReflectPermission(String name)
```

Deprecated, for removal: This API element is subject to removal in a future version.

Constructs a ReflectPermission with the specified name.

Parameters:

`name` - the name of the ReflectPermission

Throws:

`NullPointerException` - if `name` is `null`.

`IllegalArgumentException` - if `name` is empty.

ReflectPermission

```
public ReflectPermission(String name,
                         String actions)
```

Deprecated, for removal: This API element is subject to removal in a future version.

Constructs a ReflectPermission with the specified name and actions. The actions should be null; they are ignored.

Parameters:

`name` - the name of the ReflectPermission

`actions` - should be null

Throws:

`NullPointerException` - if `name` is `null`.

`IllegalArgumentException` - if `name` is empty.
