Java SE 27 & JDK 27

Enum Class AclEntryFlag

java.lang.Object
  java.lang.Enum<AclEntryFlag>
    java.nio.file.attribute.AclEntryFlag

All Implemented Interfaces:

Serializable, Comparable<AclEntryFlag>, Constable

```
public enum AclEntryFlag
extends Enum<AclEntryFlag>
```

Defines the flags for used by the flags component of an ACL `entry`.

In this release, this class does not define flags related to `AclEntryType.AUDIT` and `AclEntryType.ALARM` entry types.

Since:

1.7

Nested Class Summary

Nested classes/interfaces declared in class Enum
Enum.EnumDesc<E>

Enum Constant Summary

Enum Constants

Enum Constant	Description
DIRECTORY_INHERIT	Can be placed on a directory and indicates that the ACL entry should be added to each new directory created.
FILE_INHERIT	Can be placed on a directory and indicates that the ACL entry should be added to each new non-directory file created.
INHERIT_ONLY	Can be placed on a directory but does not apply to the directory, only to newly created files/directories as specified by the `FILE_INHERIT` and `DIRECTORY_INHERIT` flags.

NO_PROPAGATE_INHERIT	Can be placed on a directory to indicate that the ACL entry should not be placed on the newly created directory which is inheritable by subdirectories of the created directory.

Method Summary

All Methods | **Static Methods**

Modifier and Type	Method	Description
static AclEntryFlag	**valueOf**(String name)	Returns the enum constant of this class with the specified name.
static AclEntryFlag[]	**values**()	Returns an array containing the constants of this enum class, in the order they are declared.

Methods declared in class Enum

clone, compareTo, describeConstable, equals, finalize, getDeclaringClass, hashCode, name, ordinal, toString, valueOf

Methods declared in class Object

getClass, notify, notifyAll, wait, wait, wait

Enum Constant Details

FILE_INHERIT

```
public static final AclEntryFlag FILE_INHERIT
```

Can be placed on a directory and indicates that the ACL entry should be added to each new non-directory file created.

DIRECTORY_INHERIT

```
public static final AclEntryFlag DIRECTORY_INHERIT
```

Can be placed on a directory and indicates that the ACL entry should be added to each new directory created.

NO_PROPAGATE_INHERIT

```
public static final AclEntryFlag NO_PROPAGATE_INHERIT
```

Can be placed on a directory to indicate that the ACL entry should not be placed on the newly created directory which is inheritable by subdirectories of the created directory.

INHERIT_ONLY

```
public static final AclEntryFlag INHERIT_ONLY
```

Can be placed on a directory but does not apply to the directory, only to newly created files/directories as specified by the `FILE_INHERIT` and `DIRECTORY_INHERIT` flags.

Method Details

values

```
public static AclEntryFlag[] values()
```

Returns an array containing the constants of this enum class, in the order they are declared.

Returns:

an array containing the constants of this enum class, in the order they are declared

valueOf

```
public static AclEntryFlag valueOf(String name)
```

Returns the enum constant of this class with the specified name. The string must match *exactly* an identifier used to declare an enum constant in this class. (Extraneous whitespace characters are not permitted.)

Parameters:

`name` - the name of the enum constant to be returned.

Returns:

the enum constant with the specified name

Throws:

`IllegalArgumentException` - if this enum class has no constant with the specified name

`NullPointerException` - if the argument is null
