Java SE 27 & JDK 27

Class FormatFlagsConversionMismatchException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.IllegalArgumentException
          java.util.IllegalFormatException
            java.util.FormatFlagsConversionMismatchException

All Implemented Interfaces:

Serializable

```
public non-sealed class FormatFlagsConversionMismatchException
extends IllegalFormatException
```

Unchecked exception thrown when a conversion and flag are incompatible.

Unless otherwise specified, passing a `null` argument to any method or constructor in this class will cause a `NullPointerException` to be thrown.

Since:

1.5
