Java SE 27 & JDK 27

Interface RejectedExecutionHandler

All Known Implementing Classes:

ThreadPoolExecutor.AbortPolicy,
ThreadPoolExecutor.CallerRunsPolicy,
ThreadPoolExecutor.DiscardOldestPolicy,
ThreadPoolExecutor.DiscardPolicy

`public interface RejectedExecutionHandler`

A handler for tasks that cannot be executed by a `ThreadPoolExecutor`.

Since:

1.5

Method Summary

All Methods	Instance Methods	

Modifier and Type	Method	Description
`void`	**`rejectedExecution`**`(Runnable r, ThreadPoolExecutor execu`	Method that may be invoked by a `ThreadPoolExecutor` when `execute` cannot accept a task.

Method Details

rejectedExecution

```
void rejectedExecution(Runnable r,
                       ThreadPoolExecutor executor)
```

Method that may be invoked by a `ThreadPoolExecutor` when `execute` cannot accept a task. This may occur when no more threads or queue slots are available because their bounds would be exceeded, or upon shutdown of the Executor.

In the absence of other alternatives, the method may throw an unchecked `RejectedExecutionException`, which will be propagated to the caller of `execute`.

Parameters:

`r` - the runnable task requested to be executed

`executor` - the executor attempting to execute this task

Throws:

`RejectedExecutionException` - if there is no remedy
