Java SE 27 & JDK 27

Interface IntToDoubleFunction

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface IntToDoubleFunction
```

Represents a function that accepts an int-valued argument and produces a double-valued result. This is the `int`-to-`double` primitive specialization for `Function`.

This is a functional interface whose functional method is `applyAsDouble(int)`.

Since:

1.8
