Java SE 27 & JDK 27

Class CheckedOutputStream

java.lang.Object
  java.io.OutputStream
    java.io.FilterOutputStream
      java.util.zip.CheckedOutputStream

All Implemented Interfaces:

Closeable, Flushable, AutoCloseable

```
public class CheckedOutputStream
extends FilterOutputStream
```

An output stream that also maintains a checksum of the data being written. The checksum can then be used to verify the integrity of the output data.

Since:

1.1

out

Constructor Summary

Constructors

Constructor	Description
CheckedOutputStream (OutputStream out, Checksum cksum)	Creates an output stream with the specified Checksum.

Method Summary

All Methods | **Instance Methods**

Modifier and Type	Method	Description
Checksum	getChecksum()	Returns the Checksum for this output stream.
void		Writes an array of bytes.

	write(byte[] b, int off, int len)	
void	write(int b)	Writes a byte.

Methods declared in class FilterOutputStream

close, flush, write

Methods declared in class OutputStream

nullOutputStream

Methods declared in class Object

clone, equals, finalize, getClass, hashCode, notify, notifyAll, toString, wait, wait, wait

Constructor Details

CheckedOutputStream

```
public CheckedOutputStream(OutputStream out,
                           Checksum cksum)
```

Creates an output stream with the specified Checksum.

Parameters:

out - the output stream

cksum - the checksum

Method Details

write

```
public void write(int b)
           throws IOException
```

Writes a byte. Will block until the byte is actually written.

Overrides:

write in class FilterOutputStream

Parameters:

b - the byte to be written

Throws:

IOException - if an I/O error has occurred

write

```
public void write(byte[] b,
                  int off,
                  int len)
           throws IOException
```

Writes an array of bytes. Will block until the bytes are actually written.

Overrides:

write in class FilterOutputStream

Parameters:

b - the data to be written

off - the start offset of the data

len - the number of bytes to be written

Throws:

IOException - if an I/O error has occurred

See Also:

FilterOutputStream.write(int)

getChecksum

```
public Checksum getChecksum()
```

Returns the Checksum for this output stream.

Returns:

the Checksum
