Interface FileFilter

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface FileFilter
```

A filter for abstract pathnames.

Instances of this interface may be passed to the `listFiles(FileFilter)` method of the `File` class.

Since:

1.2

Method Summary

Abstract Methods

Modifier and Type	Method	Description
boolean	`accept(File pathname)`	Tests whether or not the specified abstract pathname should be included in a pathname list.

Method Detail

accept

```
boolean accept(File pathname)
```

Tests whether or not the specified abstract pathname should be included in a pathname list.

Parameters:

`pathname - The abstract pathname to be tested`

Returns:

`true if and only if pathname should be included`
