Constructor Detail

AtomicMoveNotSupportedException

```
public AtomicMoveNotSupportedException(String source,
                                       String target,
                                       String reason)
```

Constructs an instance of this class.

Parameters:

source - a string identifying the source file or null if not known

target - a string identifying the target file or null if not known

```
reason - a reason message with additional information
```
