java.util

Class MissingFormatArgumentException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.IllegalArgumentException
          java.util.IllegalFormatException
            java.util.MissingFormatArgumentException

All Implemented Interfaces:

Serializable

```
public class MissingFormatArgumentException
extends IllegalFormatException
```

Unchecked exception thrown when there is a format specifier which does not have a corresponding argument or if an argument index refers to an argument that does not exist.

Unless otherwise specified, passing a `null` argument to any method or constructor in this class will cause a `NullPointerException` to be thrown.

Since:

1.5
