java.util

Class MissingResourceException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.util.MissingResourceException

All Implemented Interfaces:

Serializable

```
public class MissingResourceException
extends RuntimeException
```

Signals that a resource is missing.

Since:

JDK1.1

See Also:

Exception, ResourceBundle, Serialized Form

Constructor Summary

Constructors

Constructor	Description
`MissingResourceException(String s, String className, String key)`	Constructs a MissingResource with the specified information.

Method Summary

Concrete Methods		
Modifier and Type	**Method**	**Description**
`String`	`getClassName()`	Gets parameter passed by constructor.
`String`	`getKey()`	Gets parameter passed by constructor.

Methods inherited from class java.lang.Throwable

`addSuppressed`, `fillInStackTrace`, `getCause`, `getLocalizedMessage`, `getMessage`, `getStackTrace`, `getSuppressed`, `initCause`, `printStackTrace`, `printStackTrace`, `printStackTrace`, `setStackTrace`, `toString`

Methods inherited from class java.lang.Object

`clone`, `equals`, `finalize`, `getClass`, `hashCode`, `notify`, `notifyAll`, `wait`, `wait`, `wait`

Constructor Detail

MissingResourceException

```
public MissingResourceException(String s,
                                String className,
                                String key)
```

Constructs a MissingResourceException with the specified information. A detail message is a String that describes this particular exception.

Parameters:

`s - the detail message`

`className - the name of the resource class`

`key - the key for the missing resource.`

Method Detail

getClassName

```
public String getClassName()
```

Gets parameter passed by constructor.

Returns:

the name of the resource class

getKey

```
public String getKey()
```

Gets parameter passed by constructor.

Returns:

the key for the missing resource
