java.util.concurrent

Interface Delayed

All Superinterfaces:

`Comparable<Delayed>`

All Known Subinterfaces:

`RunnableScheduledFuture<V>, ScheduledFuture<V>`

```
public interface Delayed
extends Comparable<Delayed>
```

A mix-in style interface for marking objects that should be acted upon after a given delay.

An implementation of this interface must define a `compareTo` method that provides an ordering consistent with its `getDelay` method.

Since:

`1.5`

Method Summary

Abstract Methods

Modifier and Type	Method	Description
`long`	`getDelay(TimeUnit unit)`	Returns the remaining delay associated with this object, in the given time unit.

Methods inherited from interface java.lang.Comparable

compareTo

Method Detail

getDelay

```
long getDelay(TimeUnit unit)
```

Returns the remaining delay associated with this object, in the given time unit.

Parameters:

`unit - the time unit`

Returns:

`the remaining delay; zero or negative values indicate that the delay has already elapsed`
