java.util.concurrent

Class ThreadPoolExecutor.DiscardOldestPolicy

java.lang.Object
  java.util.concurrent.ThreadPoolExecutor.DiscardOldestPolicy

All Implemented Interfaces:

RejectedExecutionHandler

Enclosing class:

ThreadPoolExecutor

```
public static class ThreadPoolExecutor.DiscardOldestPolicy
extends Object
implements RejectedExecutionHandler
```

A handler for rejected tasks that discards the oldest unhandled request and then retries `execute`, unless the executor is shut down, in which case the task is discarded.

Constructor Summary

Constructors

Constructor	Description
`DiscardOldestPolicy()`	Creates a `DiscardOldestPolicy` for the given executor.

Method Summary

Concrete Methods

Modifier and Type	Method	Description
void	**rejectedExecution**(**Runnable** r, **ThreadPoolExecutor** e)	Obtains and ignores the next task that the executor would otherwise execute, if one is immediately available, and then retries execution of task r, unless the executor is shut down, in which case task r is instead discarded.

Methods inherited from class java.lang.Object

clone, equals, finalize, getClass, hashCode, notify, notifyAll, toString, wait, wait, wait

Constructor Detail

DiscardOldestPolicy

```
public DiscardOldestPolicy()
```

Creates a `DiscardOldestPolicy` for the given executor.

Method Detail

rejectedExecution

```
public void rejectedExecution(Runnable r,
                              ThreadPoolExecutor e)
```

Obtains and ignores the next task that the executor would otherwise execute, if one is immediately available, and then retries execution of task r, unless the executor is shut down, in which case task r is instead discarded.

Specified by:

`rejectedExecution` in interface `RejectedExecutionHandler`

Parameters:

```
r - the runnable task requested to be executed

e - the executor attempting to execute this task
```
