java.util.function

Interface DoubleToIntFunction

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface DoubleToIntFunction
```

Represents a function that accepts a double-valued argument and produces an int-valued result. This is the `double`-to-`int` primitive specialization for `Function`.

This is a functional interface whose functional method is `applyAsInt(double)`.

Since:

1.8

`Function`

Method Summary

Abstract Methods

Modifier and Type	Method	Description
int	**applyAsInt**(double value)	Applies this function to the given argument.

Method Detail

applyAsInt

```
int applyAsInt(double value)
```

Applies this function to the given argument.

Parameters:

`value - the function argument`

Returns:

`the function result`
