Interface IntBinaryOperator

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface IntBinaryOperator
```

Represents an operation upon two `int`-valued operands and producing an `int`-valued result. This is the primitive type specialization of `BinaryOperator` for `int`.

This is a functional interface whose functional method is `applyAsInt(int, int)`.

Since:

1.8
