java.util.function

Interface IntSupplier

Functional Interface:

This is a functional interface and can therefore be used as the assignment target for a lambda expression or method reference.

```
@FunctionalInterface
public interface IntSupplier
```

Represents a supplier of `int`-valued results. This is the `int`-producing primitive specialization of `Supplier`.

There is no requirement that a distinct result be returned each time the supplier is invoked.

This is a functional interface whose functional method is `getAsInt()`.

Since:

1.8
