Constructor Detail

InvalidPreferencesFormatException

```
public InvalidPreferencesFormatException(Throwable cause)
```

Constructs an InvalidPreferencesFormatException with the specified cause.

Parameters:

cause - the cause (which is saved for later retrieval by the Throwable.getCause() method).

InvalidPreferencesFormatException

```
public InvalidPreferencesFormatException(String message)
```

Constructs an InvalidPreferencesFormatException with the specified detail message.

Parameters:

message - the detail message. The detail message is saved for later retrieval by the Throwable.getMessage() method.

InvalidPreferencesFormatException

```
public InvalidPreferencesFormatException(String message,
                                         Throwable cause)
```

Constructs an InvalidPreferencesFormatException with the specified detail message and cause.

Parameters:

message - the detail message. The detail message is saved for later retrieval by the Throwable.getMessage() method.

cause - the cause (which is saved for later retrieval by the Throwable.getCause() method).
