Constructor Detail

DataFormatException

```
public DataFormatException()
```

Constructs a DataFormatException with no detail message.

DataFormatException

```
public DataFormatException(String s)
```

Constructs a DataFormatException with the specified detail message. A detail message is a String that describes this particular exception.

Parameters:

`s - the String containing a detail message`

contains more detailed, developer-targeted descriptions, with conceptual overviews, definitions of terms, workarounds, and working code examples.
