java.lang

Class NullPointerException

java.lang.Object
  java.lang.Throwable
    java.lang.Exception
      java.lang.RuntimeException
        java.lang.NullPointerException

All Implemented Interfaces:

Serializable

```
public class NullPointerException
extends RuntimeException
```

Thrown when an application attempts to use `null` in a case where an object is required. These include:

- Calling the instance method of a `null` object.
- Accessing or modifying the field of a `null` object.
- Taking the length of `null` as if it were an array.
- Accessing or modifying the slots of `null` as if it were an array.
- Throwing `null` as if it were a `Throwable` value.

Applications should throw instances of this class to indicate other illegal uses of the `null` object. `NullPointerException` objects may be constructed by the virtual machine as if suppression were disabled and/or the stack trace was not writable.

Since:

`JDK1.0`

Constructor Summary

Constructors	Description
`NullPointerException()`	Constructs a `NullPointerException` with no detail message.
`NullPointerException(String s)`	Constructs a `NullPointerException` with the specified detail message.

Method Summary

Methods inherited from class java.lang.Throwable

`addSuppressed`, `fillInStackTrace`, `getCause`, `getLocalizedMessage`, `getMessage`, `getStackTrace`, `getSuppressed`, `initCause`, `printStackTrace`, `printStackTrace`, `printStackTrace`, `setStackTrace`, `toString`

Methods inherited from class java.lang.Object

`clone`, `equals`, `finalize`, `getClass`, `hashCode`, `notify`, `notifyAll`, `wait`, `wait`, `wait`

Constructor Detail

NullPointerException

```
public NullPointerException()
```

Constructs a `NullPointerException` with no detail message.

NullPointerException

```
public NullPointerException(String s)
```

Constructs a `NullPointerException` with the specified detail message.

Parameters:

C

```
s - the detail message.
```
